Eau de Parfum

Eau de Parfum (EDP) is a fragrance with a concentration of perfume oils that's less than Extrait de Parfum. It has a lighter scent but still lasts long. It's versatile and suitable for day or night wear. Eau de Parfum is applied to pulse points on the skin and is available in various sizes and price ranges.

Extrait de Parfum

Extrait de Parfum is a highly concentrated fragrance with a high percentage of perfume oils, making it the most potent and long-lasting form of fragrance. It's considered a luxurious and expensive option due to the high concentration of expensive ingredients. It's applied sparingly to pulse points on the skin.
